

## Step 1: Create the Folder

### A) Create the Virtual Environment:

```
python3 -m venv venv
```

Activate the Virtual Environment

The activation command differs depending on your operating system:

On Windows:

```
venv\Scripts\activate
```

On macOS/Linux

```
source venv/bin/activate
```

### B) Clone the Project

Clone the repository using the following command:

```
git clone "https://github.com/kotlamanikanta/Django_Invoice.git"
```

### C) Navigate into the Project Folder

Enter the project folder with the command:

```
cd Invoice_Api
```

### D) Install Dependencies

Install the required dependencies listed in requirements.txt:

```
pip install -r requirements.txt
```

### E) Run the Server

Start the Django development server using the following command:

```
python manage.py runserver
```
